SUMMARY

Computer Engineer (UCI, 2023) with 2+ years of full-stack development experience. Specialized in React, Next.js, TypeScript, Node.js, and PostgreSQL, I build scalable web and mobile applications with a strong focus on performance and user experience. I have demonstrated the ability to reduce load times by over 40% and optimize complex workflows through Redis caching and Docker containerization best practices. I possess a high capacity for quickly adapting to new technologies (such as migrating to App Router or rapidly learning PHP) and seek a remote team where I can contribute a holistic product vision from code to delivery.

PROFESSIONAL EXPERIENCE

Trifecta Software (Costa Rica) — Remote Software Developer | Sep 2025 – Jan 2026

- Within my first month, I self-taught PHP and the VTiger framework, debugging and standardizing over 20 visual components of the CRM. I reduced UI errors by 60% using CSS and Bootstrap, unified visual consistency across all modules, and optimized dashboards, improving their load times by 25%.
- Participated in daily team meetings using Agile methodologies, reporting progress and managing assigned tasks through close follow-up.

Freelance — Real Estate Portal (Cuba/Brazil) Freelance Web Developer | Feb 2025 - May 2025

- Migrated a Next.js frontend (Pages Router, JavaScript) to TypeScript and App Router, improving typing, project structure, and overall performance by 35% according to Lighthouse.
- Designed and built a backend with Node.js, Express, and Puppeteer for web scraping real estate portals, extracting over 300 properties daily from multiple sources.
- Implemented a caching layer with Redis, reducing frequent query response times by 45%.
- Containerized the entire application with Docker, enabling continuous deployment and scalability of the scraping service on a VPS.

(Nov 2024 – Jan 2025: Period with no active clients. I invested this time in intensive specialization in Next.js 14 (App Router, Server Components) and unit testing with Jest, building personal projects to stay up-to-date and ready for new challenges.)

Freelance — Product Sales App (Cuba/Brazil) Freelance Mobile Developer (React Native) | Oct 2024

- Developed a mobile app with React Native and Expo for product management and sales, meeting all functional requirements within a 4-week deadline.

- Implemented advanced forms with validation using react-hook-form and Zod, ensuring the integrity of input data.
- Integrated QR code generation and scanning for unique product identification, improving traceability within the app.
- Consumed a client-provided REST API, handling loading states and errors for a smooth user experience.

EDUCATION

Bachelor of Science in Computer Science | University of Informatics Sciences (UCI), Havana 2018 – 2023

SKILLS

Technologies:

- **Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material UI, Bootstrap, React Native / Expo
- **Backend:** Node.js, Express, Python, Django
- **Databases:** PostgreSQL, Redis, MongoDB
- **DevOps and Others:** Docker, Git, Github, Postman

Tools and Methodologies:

- Version control with Gitflow, task management with Jira, asynchronous communication with Slack.
- Experience with Agile Scrum methodology.

Soft Skills:

- Problem-solving and task prioritization.
- Quick adaptation to new technologies.
- Direct communication with clients for requirements gathering and feedback.

LANGUAGES

Spanish: Native.

English: Intermediate (B1).

CERTIFICATIONS

International Software Development Course | Taught by professors from a Chinese university | June 2025 | [See Certification](#)

REMOTE WORK AVAILABILITY & SETUP

Own equipment (laptop + monitor), stable internet with mobile backup, guaranteed electrical autonomy for full workdays, and full time-zone flexibility for distributed teams.
